

HPX Stretch & Fuse

HPX Stretch en Fuse tape is a user friendly and multi functional self Amalgamating Tape. Suitable for quick repairing a leakage or for insulating electrical cables

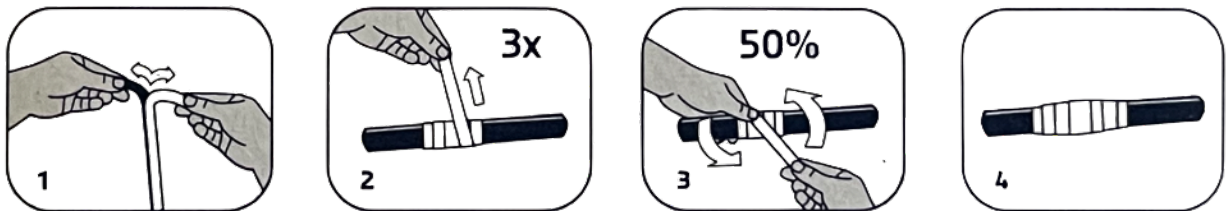

Properties

Carrier	:	Silicone
Maximum Temperature	:	200 °C (up to 260 °C for short periods)
Tensile strength	:	4,82 mPa
Thickness	:	0,50mm
Breakdown Voltage	:	8 kV
Pressure resistant	:	up to 8 bar

Technical Information

Permanente, watertight sealing
Insulation of electrical wires
Suitable for all Surfaces
Leaves no residue
Easy to Use

Eigenschappen

- 1) Remove the protective part of the tape
- 2) Stretch the tape with 3 times the original length during application
- 3) Then wrap it with 50% overlap every time. To apply in multiple layers
- 4) Self amalgamating in a few minutes
